

Formulas

Histograms:

$$\text{Block height} = \frac{\text{Percentage}}{\text{Interval width}}$$

Correlation:

$$r = \text{Average of}[X \text{ (std. units)} \times Y \text{ (std. units)}]$$

Regression:

$$\text{Predicted } Y \text{ (std. units)} = r \times X \text{ (std. units)}$$

$$\text{Slope} = \frac{r \times SD_Y}{SD_X}$$

$$\text{Intercept} = \text{Average}_Y - \text{Slope} \times \text{Average}_X.$$

RMS Error:

$$\text{RMS Error} = \sqrt{1 - r^2} \times SD_Y$$
