

**Statistics 6910:
Introduction to R
Spring 2013**

Instructor: Jürgen Symanzik

Based on Materials provided by Deb Nolan (UC Berkeley) and Duncan Temple Lang (UC Davis).

Theme

- Use the computer expressively to conduct statistical analysis of data.
- Use existing software rather than build routines from the ground up.

Theme

- Statistical Thinking in the context of computing with data
- DATA Technologies – Statisticians' work includes interfacing and working closely with the original data and those who own it

What Are Data?

Numbers

- Example: Traffic on I-80

WHAT A GREAT IDEA!

We provide a concept that will allow anyone with sufficient work experience to obtain a fully verifiable University Degree.

Bachelors, Masters or even a Doctorate.

For US: 1.781.634.7970
Outside US: +1.781.634.7970

"Just leave your NAME & PHONE NO. (with CountryCode)" in the voicemail.

Our staff will get back to you in next few days!

Statistical Thinking and the Data Analysis Cycle

- Data ACQUISITION – Input/output, regular expressions
- Data CLEANING – Verification, manipulation
- Data ORGANIZATION – Data frames, data bases, XML
- Data ANALYSIS – Fit and assess statistical models, conduct exploratory data analysis
- Data SIMULATION – Simulation studies to understand behavior of data
- Data REPORTING – Report findings

Statistical Concepts

- Basic numeracy
 - Variability, Patterns, comparisons
- Graphics
 - Elements and principles of graphing
- Computationally intensive methods, e.g.,
 - Classification and Regression trees, multi-dimensional scaling
- Simulation tools
 - Monte Carlo, bootstrap, cross-validation

Computing Concepts

- Programming concepts
 - Control flow, trees, recursion
- Regular expressions and text manipulation
- Relational databases
- Random number generation
- Representation of information in the computer
- Event handling and GUI development

Software

- R – statistical software
- SQL – structured query language for relational databases
- XML – Extensible Markup Language (and HTML)
- JavaScript – scripting language implemented in most browsers
